 **DECISION SUPPORT**

Transform your traffic control system with SPM+ Signal Performance measures plus safety analytics with the integrator-AI. Our software ensures easy deployment and universal compatibility. It's scalable, real-time responsive, and use-case automation with advanced vehicle-to-everything (v2x) integration. Elevate your traffic management and safety initiatives now. Contact us for a reliable and smarter transportation solution!

Phase Statistics

Movement Statistics

Object Statistics

Zone Statistics

Max out/Gap out/Force off counts
True split failure counts
Red/Yellow/Green – Rest + Delay times
Don't walk/Flashing don't walk/Walk – Rest + Delay times
Red/Yellow/Green – elapsed times (mean, median, min, max)
Don't walk/Flashing don't walk/Walk - elapsed times (mean, median, min, max)
Split counts
Split times (mean, median, min, max)
Arrival counts by interval (red, yellow, green)
Passage counts by interval (red, yellow, green)
Detector actuation counts
Pedestrian call counts
Stop bar + advance count comparison
True turning movement counts
Turning movement execution time (mean, median, min, max)
Turning movement delay time (mean, median, min, max)
Turning movement counts by phase indication (red, yellow, green, walk, don't walk, flashing don't walk)
Volume by object type and classification
Height, length, and width by object type and classification (mean, median, min, max)
Volume
Height, length, and width (mean, median, min, max)
